

INSTRUCTIONS: Click on the Section Number to access the fill-in-the-blank (FITB) Class Notes for each Section

Unit 1 – Class Notes	Unit 2 – Class Notes	Unit 3 – Class Notes	Unit 4 – Class Notes	Unit 5 – Class Notes
1. Section 8.3 Counting	1. Section 2.2 Linear Equations	1. Section 6.4 Solutions to Linear Systems Using Matrices	1. Section R.2 Integer Exponents	1. Section 5.1 Combining Functions
2. Section 8.6 Probability	2. Section 2.3 Linear Inequalities	2. Section 6.5 Properties and Applications of Matrices	2. Section R.4 Factoring Polynomials	2. Section 5.2 Inverse Functions and their Representations
3. Section 1.1 Numbers, Data, and Problem Solving	3. Section 1.4 Types of Functions and their Rates of Change	3. Section 6.6 Inverses of Matrices	3. Section R.7 Radical Expressions	3. Section 5.3 Exponential Functions and Models
4. Section 1.2 Visualizing and Graphing Data	4. Section 2.1 Equations of Lines	4. Section 2.4 More Modeling with Functions	4. Section R.1 The Pythagorean Theorem	4. Section 5.4 Logarithmic Functions and Models
5. Section 1.3 A Interval Notation	5. Section 6.1 Functions and Systems of Equations in 2 Variables	5. Section 2.5 Absolute Value Equations and Inequalities	5. Section 3.2 Quadratic Equations	5. Section 5.5 Properties of Logarithms
6. Section 1.3 B Function Basics	6. Section 6.2 Systems of Inequalities in 2 Variables	6. Section 3.1 Quadratic Functions and Models	6. Section 3.4 Quadratic Inequalities	6. Section 5.6 Logarithmic Equations using Properties
		7. Section 3.5 Transformations of Graphs	7. Section 4.2 Polynomial Functions and Models	
			8. Section 4.6 Rational Functions and Models
